

Virkon™ S

LANXESS

Disinfection of PEDv*, PRRS* and Porcine Rotavirus* at 1:600

Virkon™ S provides effective disinfection against PEDv*, PRRS* and Porcine Rotavirus* at a cost-effective 1:600 in-use dilution rate.

In a recent comparison study, the peroxygen based formula of Virkon™ S Disinfectant and Virucide (LANXESS) clearly demonstrated a significant cost in-use saving over a general Glut/QAC chemistry.

When used in accordance with product instructions, **one 10lb. pail of Virkon™ S** can generally provide enough in-use solution to disinfect

99,630ft² of surface area against PEDv, PRRS and Porcine Rotavirus at a dilution rate of 1:600. To disinfect the same surface area using **Glut/QAC**, it would take approximately **3 one gallon bottles** at a dilution rate of 1:256.

Conditions	Virkon™ S 10lb. Pail	Glut/QAC 1 gal Bottle
Retail price of product per pack	\$71.00 (AWP)	\$30.00 (AWP)

Final cost per gallon: in-use dilution	\$0.10/gal	\$0.12/gal
Total surface area	99,630 ft² 9.96 houses 	34,560 ft² 3.46 houses

Disinfection of a **10,000ft²** swine house at a **1:600 dilution** rate **one 10lb. pail of Virkon™ S** can generally be used to make enough solution to disinfect **9.96 swine houses** against PEDv*, PRRS* and Porcine Rotavirus* compared to **3.46 houses** for a **one gallon bottle of Glut/QAC product**.

Area of disinfection is based on 135ft²/gal in-use dilution against PEDv*, PRRS* and Porcine Rotavirus*. As with any product, use of Virkon™ S in any given application must be tested (including field testing, etc.) by the user in advance to determine suitability.
